DETAILED ACTION

1. Receipt is acknowledged of the pre-amendment filed 11/12/03.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 1, 3, 5, 6, 8-17, 23-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Aubrey, US Patent No. 4,798,942, cited by the applicant, in view of Cubic Transportation System (hereinafter Cubic), cited by the applicant.

Aubrey disclose an easy access ticket transport mechanism comprising: a ticket processing system 62 for processing information encoded on a magnetic stripe on the ticket 16 on a ticket is provided within the housing 12 along the ticket path, the processing system includes a read head 64, a write/encode head 66, and a verify head 68 mounted on the supporting wall at spaced positions along the ticket path, the various heads are positioned to

process information on a band or stripe located on the lower face of a ticket moving along the path (see figures 1-3, 7; col. 6, line 3+).

Audrey fails to disclose or fairly suggest that the ticket processing includes wireless and judging means for processing the wireless tickets and that a first and a second conveying means arranged in series.

Cubic discloses a transportation system comprising: an automatic ticket-examining apparatus for collecting wireless tickets; wireless communication means provided on each end of the surface of the body; and having conveying means in both ends of the apparatus.

In view of Cubic's teachings, it would have been obvious for a person of ordinary skill in the art at the time the invention was made to modify the system of Aubrey to perform both contact and non-contact transactions. Such modification would enhance the system operation and would make the system more practical. With regard to some of the customize limitations, such having both conveying mechanism arranged in series, these limitations fall within the engineering design choice, failing to provide any unexpected results. Therefore, it would have been obvious extension as taught by Audrey.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ohtsuki et al, US Patent No. 5,831,547, disclose a wireless card. Mimata, US Patent No. 6,070,146, discloses a ticket issuing system, ticket checking system.
